

2017 MODEL

Robert DiLutis Reed Cases

Thank you for purchasing the Robert DiLutis Reed Case. Your new case comes with a 5 year guarantee and should provide years of quality storage. The reed case comes **unset** and the humidifier inside will need to be soaked. Remove the humidifier by pulling up on the edges of the brass unit. Soak in a glass of warm water for 20-30 minutes. Replace inside case. Once all 8 reeds are inside, the case will keep your reeds at a constant humidity level of 60 - 70%. If for some reason the level goes below this, add more water to the humidifier. If you have further questions please feel free to email me at thereedmachine@gmail.com or visit our web site at TheReedMachine.net.
